Eagle Project Proposal  
Richard Burke

Tuesday, February 10, 2009

- Construction of steel frame (legs and contoured support)
- Cutting boards to length
- Shaping ends of cut boards
- Drilling holes in boards
- Assembling benches: bolting back plates to legs  
and boards to back plates
- Securing bench legs to sona tubes
- Edging around benches
- Filling area underneath with stones or stone dust
- Digging holes for sona tubes
- Removing grass from around bench area
- Setting and leveling sona tubes
- Mixing cement
- Filling sona tubes

## Materials

- Steel legs and contoured back plates
- Sona tubes
- Easy-mix cement for sona tubes
- Synthetic boards for bench face
- Stones or stone dust for around benches
- Edging to keep stones separate from grass
